

ON TIME FOR A CHANGE

for our customers and for our planet!

1/3 less energy used to re-melt recycled glass

creating glass from raw materials uses much more energy!

100 % RECYCLABILITY

glass can be recycled and remelted without quality loss, making it **endlessly** reusable

50 times will glass bottles be refilled commercially

but feel free to keep reusing yours!

GLASS

1/5th of recovery time compared to birchwood

BAMBOO it's versatile: food, fuel, textile, writing surface, or just as a material by itself!

it's **compostable!**

each sprout grows for only 60 days, but they get consecutively **bigger**

fast growing! up to **1 mm** every **90 sec**

8 million tonnes of waste have been recycled

RECYCLING

74% glass recycling

less than 1/2 the UK recycled only 44.6% of total waste in 2021

71% of paper and cardboard reused

20x re-recycled and therefore saves trees

CARDBOARD & PAPER

lightweight and sturdy

made from 70% recycled paper

soy and vegetable inks for eco-friendly printing

recycled paper turns into new packages, paper bags, magazines and paper

going vegan saves **9 kg** CO₂ / day

equivalent to the weight of a dachshund

vegan vs omnivore: saves **54%** water

1/4th of agricultural land usage to produce plantbased food

PLANTBASED

a plantbased diet reduces inflammatory processes in the body and relieves arthrose pain!

we plant 1 tree for every 8th sold sandwich box

GIVING BACK

we source our ingredients locally and **DONATE** unsold food to charity

carbon-neutral & eco-friendly
